

REFEREED PUBLICATIONS

George C. Craig, DLR Institut für Physik der Atmosphäre

42. Pfeifer M., G. C. Craig, M. Hagen and C. Keil, 2007: A polarimetric radar forward operator for model evaluation. *J. Appl. Meteor. Clim.*, submitted.
41. Done, J. M., G. C. Craig, S. L. Gray, P. A. Clark and M. E. B. Gray, 2007: The predictability of deep convection in a mesoscale model. *Quart. J. Roy. Meteor. Soc.*, submitted.
40. Craig, G. C., and A. Dörnbrack, 2007: Entrainment in Cumulus Clouds: What Resolution is Cloud-Resolving? *J. Atmos. Sci.*, in press.
39. Keil, Christian, A. Röpneck, G. C. Craig, and U. Schumann, 2007: Sensitivity of quantitative precipitation forecasts to height dependent changes in humidity. *Geophys. Res. Lett.*, in press.
38. Wulfmeyer, V., G. C. Craig, and 22 others, 2007: The Convective and Orographically-induced Precipitation Study: A Research and Development Project of the World Weather Research Program for Improving Quantitative Precipitation Forecasting in Low-mountain Regions *Bull. Amer. Meteor. Soc.*, in press.
37. Plant, J. M., and G. C. Craig, 2007: A stochastic parameterization for deep convection based on equilibrium statistics. *J. Atmos. Sci.*, **65**, 87-105.
36. Keil, C., and G. C. Craig, 2007: A displacement-based error measure applied in a regional ensemble forecasting system. *Mon. Wea. Rev.*, **135**, 3248-3259.
35. Cohen, B. G. and G. C. Craig, 2006: Fluctuations in an equilibrium convective ensemble. Part II: Numerical experiments. *J. Atmos. Sci.*, **63**, 2005-2015.
34. Craig, G. C. and B. G. Cohen, 2006: Fluctuations in an equilibrium convective ensemble. Part I: Theoretical basis. *J. Atmos. Sci.*, **63**, 1996-2004.
33. Done, J. M., G. C. Craig, S. L. Gray, P. A. Clark and M. E. B. Gray, 2006: Mesoscale simulations of organised convection: Importance of convective equilibrium. *Quart. J. Roy. Meteor. Soc.*, **132**, 737-756.
32. Agusti-Panareda, A., S. L. Gray, G. C. Craig, and C. D. Thorncroft, 2005: The extratropical transition of tropical cyclone Lili (1996) and its crucial contribution to a moderate extratropical development. *Mon. Wea. Rev.*, **133**, 1562-1573.
31. Küpper, C., J. Thuburn, G. C. Craig, and T. Birner, 2004: Mass and water vapour transport into the tropical stratosphere: A cloud-resolving simulation. *J. Geophys. Res.*, **107**, , D10111, doi:10.1029/2004JD004541.
30. Cohen, B. G. and G. C. Craig, 2004: The response time of a convective cloud ensemble to a change in forcing. *Quart. J. Roy. Meteor. Soc.*, **130**, 933-944.
29. Agusti-Panareda, A., C. D. Thorncroft, G. C. Craig, and S. L. Gray, 2004: The extratropical transition of hurricane Irene (1999): A potential vorticity perspective. *Quart. J. Roy. Meteor. Soc.*, **130**, 1047-1074.

28. Ahmadi-Givi, F., G. C. Craig and R.S. Plant, 2004: The dynamics of a mid-latitude cyclone with very strong latent heat release. *Quart. J. Roy. Meteor. Soc.*, **130**, 295-324.
27. R. Plant, G. C. Craig, and S. L. Gray, 2003: On a threefold classification of extratropical cyclogenesis. *Quart. J. Roy. Meteor. Soc.*, **129**, 2989-3012.
26. Barry, L., G. C. Craig, and J. Thuburn, 2002: Poleward eddy heat transport by the atmospheric heat engine. *Nature*, **415**, 774-777.
25. Thuburn, J., and G. C. Craig, 2002: On the temperature structure of the tropical stratosphere. *J. Geophys. Res.*, **107**, doi:10.1029/2000JD000285.
24. Stiller, O., and G. C. Craig, 2001: A scaling hypothesis for moist convective up-draughts. *Quart. J. Roy. Meteor. Soc.*, **127**, 1551-1570.
23. Hewson, T. D., G. C. Craig, and C. Claud, 2000: Evolution and mesoscale structure of a polar low outbreak. *Quart. J. Roy. Meteor. Soc.*, **126**, 1031-1063.
22. Pytharoulis, I., G. C. Craig, and S. P. Ballard, 2000: The hurricane-like Mediterranean cyclone of January 1995. *Meteor. Apps.*, **7**, 261-279.
21. Barry, L., G. C. Craig, and J. Thuburn, 2000: A GCM investigation into the nature of baroclinic adjustment. *J. Atmos. Sci.*, **57**, 1141-1155.
20. Thuburn, J., and G. C. Craig, 2000: Stratospheric influence on tropopause height: The radiative constraint. *J. Atmos. Sci.*, **57**, 17-28.
19. Tompkins, A. M., and G. C. Craig, 1999: Sensitivity of tropical convection to sea surface temperature in the absence of large-scale flow. *J. Climate*, **12**, 462-476.
18. Pytharoulis, I., G. C. Craig, and S. P. Ballard, 1999: Study of the hurricane-like Mediterranean cyclone of January 1995. *Phys. Chem. Earth*, **24**, 627-632.
17. Tompkins, A. M., and G. C. Craig, 1998: Timescales of adjustment to radiative-convective equilibrium in the tropical atmosphere. *Quart. J. Roy. Meteor. Soc.*, **124**, 2693-2713.
16. Tompkins, A. M., and G. C. Craig, 1998: Radiative-convective equilibrium in a three dimensional cloud ensemble model. *Quart. J. Roy. Meteor. Soc.*, **124**, 2073-2097. 263-266.
15. Gray, M. E. B., G. J. Shutts, and G. C. Craig, 1998: The role of mass transfer in describing the dynamics of mesoscale convective systems. *Quart. J. Roy. Meteor. Soc.*, **124**, 1183-1207.
14. Gray, S. L., and G. C. Craig, 1998: A simple theoretical model for the intensification of tropical cyclones and polar lows. *Quart. J. Roy. Meteor. Soc.*, **124**, 919-948.
13. Petch, J. C., G. C. Craig, and K. P. Shine, 1997: A comparison of two bulk micro-physical schemes and their effects on radiative transfer using a single column model. *Quart. J. Roy. Meteor. Soc.*, **123**, 1561-1580.

12. Thurnburn, J., and G. C. Craig, 1997: GCM tests of theories for the height of the tropopause. *J. Atmos. Sci.*, **54**, 869-882.
